Osciloscopios de la serie TDS1000B

Productivos de forma instantánea. Increíblemente sencillos.

Los osciloscopios de almacenamiento digital de la serie TDS1000B ofrecen una combinación de rendimiento y facilidad de uso sin rival en el mercado, a un precio que está a su alcance.

Precisión digital a un precio asequible

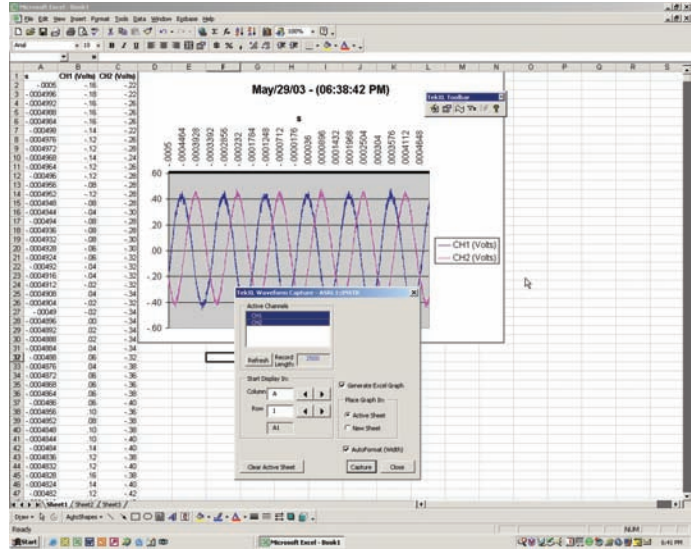

Con un ancho de banda de hasta 100 MHz y una frecuencia de muestreo máxima de 1 GS/s, no existe otro osciloscopio de almacenamiento digital que ofrezca tanto ancho de banda y tanta frecuencia de muestreo por el mismo precio. Los osciloscopios de la serie TDS1000B proporcionan una adquisición precisa en tiempo real en todo su ancho de banda, la misma longitud de grabación en todas las configuraciones básicas de tiempo, disparadores avanzados para aislar las señales de interés y 12 mediciones automáticas estándar en todos los modelos. Sus funciones matemáticas de suma, resta y multiplicación de forma de onda, además de la Transformada rápida de Fourier (FFT), le permiten analizar, caracterizar y resolver los problemas de los circuitos.

Captura de forma de onda rápida y sencilla

Gracias a su sencilla interfaz de usuario, basada en controles clásicos de tipo analógico, estos instrumentos son fáciles de utilizar, por lo que se reduce el tiempo de aprendizaje y se incrementa la eficiencia. Funciones innovadoras, como el menú Autoconfiguración, el Asistente de comprobación de punta de prueba y el menú Ayuda sensible al contexto optimizan la configuración y el funcionamiento del instrumento.

Transferencia flexible de datos

Al disponer de puertos USB para host y para dispositivos que permiten almacenamiento de datos extraíble, perfecta conectividad a PC e impresión directa, no existe otro osciloscopio de almacenamiento digital que ofrezca tanta flexibilidad y facilidad de manejo por este precio.

Capture, guarde y analice con gran facilidad los resultados de las mediciones con el software de comunicaciones para PC OpenChoice.

Documentación y análisis sencillos

Capture y analice con gran facilidad los resultados de las mediciones con el software de comunicaciones para PC OpenChoice. Simplemente tiene que exportar los datos de las imágenes de pantalla y las formas de onda a la aplicación de escritorio independiente o directamente a Microsoft Word y Excel. Como complemento para OpenChoice, el software National Instruments SignalExpress Tektronix Edition pone a su alcance funciones ampliadas, entre las que se incluyen el análisis avanzado, el control remoto del osciloscopio y el análisis de la forma de onda activa. O bien, si prefiere no utilizar la PC, puede imprimir su imagen directamente con cualquier impresora compatible con PictBridge por medio del puerto USB para dispositivos.

Un rendimiento de confianza

Con Tektronix tendrá la seguridad de un rendimiento en el que puede confiar. Además de su servicio y asistencia líderes en la industria, los osciloscopios de la serie TDS1000B incluyen la cobertura de Garantía de por vida*1 como componente estándar.
